SUMMARY

Graphic Designer with hands-on experience creating visual assets across branding, layout, and digital media - including logos, marketing collateral, social media creatives, posters, and UI graphics - using Adobe Illustrator, Photoshop, Figma, and Canva. Strong foundation in typography, colour theory, and visual consistency across print, web, and mobile formats. Comfortable working on live client projects, presenting concepts to stakeholders, and quickly adapting to new design tools and workflows.

DESIGN EXPERIENCE

Graphic Design Intern - The Entrepreneurship Network

Sep 2022 – Jan 2024 | Part-time

- Designed visual layouts, marketing graphics, and presentation-ready assets for startup client campaigns, from concept sketches to high-fidelity artwork.
- Applied typography systems, colour hierarchy, and brand consistency principles across print and digital deliverables, including decks, social creatives, and screen graphics.
- Served as design point-of-contact with cross-functional teams over 16 months, presenting visual concepts and incorporating client feedback across multiple project cycles.

DESIGN PROJECTS

SkillSyniq AI - Brand & Visual Identity

Illustrator, Figma, Branding, Layout Design

- Designed the visual identity, layout system, and graphic assets for an AI-powered resume builder, from concept to production-ready design.
- Delivered the project end-to-end across 3 stages - wireframe, layout, and production - for a single cohesive product.

Doctor Appointment App - Iconography & Visual System

Figma, Iconography, Accessibility

- Designed a clean, accessible visual system with a consistent icon set and structured layouts for a healthcare brand.
- Built a single unified icon system applied consistently across the entire app for a cohesive visual language.

Food Delivery App - End-to-End Visual Design

Figma, High-fidelity Graphics, Client Presentations

- Created branding-consistent visuals and high-fidelity graphics across the complete user journey, presented directly in client decks.
- Covered all 4 stages of the user journey - browsing, ordering, checkout, and tracking - in a single cohesive visual system.

POSITIONS OF RESPONSIBILITY

- Led a university-level hackathon project to develop a full-stack web application.
- Developed and deployed a personal full-stack web application using Spring Boot and a modern JavaScript framework.

EXTRA-CURRICULAR ACHIEVEMENTS

- Organized Cricket under Synergy, the intra-college sports festival of Anurag University, with an overall footfall of 800+ participants from students and staff.
- Led a team of four responsible for scheduling matches between 60+ registered teams, addressing logistical concerns, crowd management, and seamless execution of the event.
